

PPWR: How can Weavabel support customers with PPWR compliance?

As a packaging supplier and compliance partner, Weavabel helps customers prepare for PPWR through practical guidance, technical expertise, and digital compliance solutions. Our services include:

PPWR Compliance Reviews: Assessing packaging against current and upcoming PPWR requirements.

Packaging Material Assessments: Reviewing material composition and identifying opportunities to improve recyclability.

Technical Documentation Support: Collecting supplier declarations, certificates, test reports, and technical information required for compliance.

Recyclability Assessments: Evaluating packaging against Design for Recycling principles and future PPWR recyclability requirements.

Artwork & Packaging Marking Reviews: Advising on recycling labels, material identification codes, and country-specific packaging labelling requirements.

Material Selection Advice: Recommending compliant and more sustainable packaging materials.

Supplier Engagement: Working directly with manufacturers to obtain the evidence required for PPWR technical documentation.

“Our goal is not only to supply packaging but to help customers build a compliant, future-ready packaging strategy. By combining Weavabel’s packaging expertise with the digital capabilities of osapiens, we can simplify PPWR compliance and help businesses prepare with confidence.”

Digital Compliance through our partnership with osapiens.

Weavabel has partnered with osapiens to provide customers with a comprehensive digital compliance solution that supports regulatory requirements, including PPWR.

Through this partnership, we can help customers:

- Digitize and manage packaging compliance documentation.
- Improve supplier data collection and traceability.
- Centralize technical documentation and declarations.
- Monitor regulatory developments and maintain compliance records in one platform.
- Streamline compliance processes across multiple suppliers and packaging components.
- PPWR awareness and training workshops.
- Regular updates on implementing acts, delegated acts, and new European Commission guidance.

Advice on international packaging regulations, including the EU, UK, US, France (Triman), Italy, Spain, South Korea, Australia, and other market-specific packaging and recycling requirements.

Why work with Weavabel?

- Packaging expertise combined with regulatory knowledge.
- Strategic partnership with osapiens to support digital compliance and traceability.
- Direct engagement with suppliers to gather accurate compliance documentation.
- Practical, commercially focused advice rather than just interpreting legislation.
- Ongoing support as PPWR requirements continue to evolve.
